Our guiding principles

Our success as a business is guided by the principles of Value, Transparency and Sustainability, or **VTS**.

Value

We provide products and solutions people need at a competitive price—backed by dedication to excellent customer service.

Transparency

We communicate clearly and openly so people can understand what they are buying.

Sustainability

Our products stand the test of time. We're financially disciplined, so we'll be here when customers need us.

High-quality investment portfolio

Our balance sheet reflects our rigorous risk management and strict asset-liability matching standards.

- 96.9% of fixed-maturities portfolio is investment grade.
- Commercial mortgage loan portfolio:
  - Provides attractive yields relative to Treasury securities.
  - 94.9% of portfolio is considered lower or medium risk based on loan-to-value and debt-service coverage ratios.
  - Excellent credit performance.

Parent company

Sumitomo Life, a mutual insurance company with over 100 years of history and one of the largest life insurance companies in Japan.

Together, Sumitomo Life and Symetra have total assets of \$318 billion.<sup>4</sup>

Not a bank or credit union deposit, obligation or guarantee	May lose value
Not FDIC or NCUA/NCUSIF insured	Not insured by any federal government agency

## Diverse product offerings

We provide products and services that help people and businesses achieve their financial goals.

### Retirement Division

Annuity solutions providing asset protection, growth and guaranteed income in retirement.

- Fixed indexed annuities (FIA)
  - Includes products with a Guaranteed Lifetime Withdrawal Benefit (GLWB)
- Registered index-linked annuities (RILA)
- Fixed deferred annuities
- Income annuities:
  - Includes single premium immediate annuities (SPIA) and deferred income annuities (DIA)

### Benefits Division

Products that help businesses stay competitive while providing valuable coverage to employees and their families.

- Stop loss
- Workforce Benefits
  - Group life and accidental death and dismemberment (AD&D) insurance
  - Group disability insurance and absence management programs
  - Group supplemental health insurance
    - Accident
    - Critical illness
    - Hospital indemnity
    - Symetra Health

### Individual Life Division

Products that help provide families and businesses with financial protection and stability.

- Term life insurance
- Universal life insurance
- Indexed universal life insurance
- Variable universal life insurance

## About Symetra Life Insurance Company

- Established in 1957.
- Well-positioned to execute on our growth plans.
- Committed to our products and distribution strategies:
  - Annuities with transparent features and benefits.

# Putnam Dynamic Low Volatility Excess Return Index

Ticker: **PDLV5E**

Factsheet as of September 30, 2024

FRANKLIN  
TEMPLETON

## Index Overview

A rules-based index that seeks to avoid unwanted surprises, the Putnam Dynamic Low Volatility Excess Return Index combines U.S. stocks, Treasury bonds, and cash asset classes to pursue attractive risk-adjusted returns. On a daily basis, the Index can flex and rebalance, targeting volatility centered around 5%.

**Pursues consistent returns** with a simple mix of stocks, bonds, and cash asset classes and a dynamic process that aims to control volatility.

**Seeks out low-volatility stocks** of large U.S. companies that have better historical risk-adjusted returns than the S&P 500 Index.

**Dynamic daily rebalancing** to target 5% volatility, seeking both growth and protection as markets demand.

## Average Annual Total Returns (%)

	1-Yr	3-Yr	5-Yr	10-Yr	Inception	Inception Date
Putnam Dynamic Low Volatility Excess Return Index	5.93	-2.60	-1.03	2.87	4.01	12/29/1989

## Cumulative Total Returns (%)

	3-Mth	YTD	2023	2022	2021	2020	2019	2018	2017	2016	2015	2014
Putnam Dynamic Low Volatility Excess Return Index	4.15	3.01	-2.21	-11.62	3.13	4.04	11.62	-0.34	12.81	4.21	1.11	9.74

**Performance data quoted represents hypothetical and past performance, which does not guarantee future results.** Current performance may differ from figures shown. Hypothetical back-test for illustrative purposes only. The Putnam Dynamic Low Volatility Excess Return Index performance and weights data are based on back-tested data prior to the actual launch of the index. The Putnam Dynamic Low Volatility Excess Return Index back-test inception is December 29, 1989. **All information for the index and any growth prior to its launch date is back-tested, based on the methodology that was in effect on the launch date of June 24, 2020.**

The performance of the Index may include certain embedded transaction costs but does not include fees or costs of any financial instrument referencing the Index. This "embedded index cost" will reduce any change in index value over the index term that would otherwise have been used in the calculation of index interest and it funds certain operational and licensing costs for the index. It is not a fee paid by you. **Please see disclosures on page 2.**

## Constituent Allocations (% of Total)

Index weights for last 10 years. All information for the Index prior to its launch date is back-tested, based on the methodology that was in effect on the launch date on June 24, 2020. Weightings are based on total index, are subject to change at any time, and are provided for informational purposes only. Not to be construed as a recommendation to purchase or sell any security.

## Hypothetical Growth of \$100,000

## Index Information

Ticker	PDLV5E
Volatility Target	N/A
Back-Test Inception	12/29/1989
Live Inception	06/24/2020
Use of Leverage	No
Index Currency	US Dollar
Rebalance Frequency	Daily
Calculation Frequency	End of Day

## Constituent Allocation Weights (% of Total)

	Index
10-Year US Treasury Futures	56.79
US Large Cap Equity	43.21

US bonds represented by S&P 10-year US Treasury Notes Futures index. Cash represented by US Treasury 13-Week Bill High Discount Rate. US large cap equity represented by S&P Low Volatility Index.

## Design Team

Franklin Templeton Investment Solutions translates a wide variety of investor goals into portfolios powered by Franklin Templeton's best thinking around the globe. The team includes more than 100 investment professionals, specializing in strategic asset allocation and tactical positioning, fundamental and quantitative research, active integration, and risk management.

## Index Risks

Stock prices fluctuate, sometimes rapidly and dramatically, due to factors affecting individual companies, particular industries or sectors, or general market conditions. Bond prices generally move in the opposite direction of interest rates. Thus, as the prices of bonds adjust to a rise in interest rates, the performance of the Index may decline. During times of extreme market volatility, the Index will not be able to eliminate market losses or capture all market gains.

## Important Information

**It is not possible to invest directly in an index.** There is no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. There is no guarantee that any strategies utilizing the Index will be effective or successful. Multi-asset indices and diversification do not promise any level of performance, success, or guarantee against loss of principal. This does not serve as an offer to sell or a solicitation of an offer to buy any product or security or the use or suitability of the Index. This information should not be relied upon as investment advice, research, or a recommendation by Franklin or Putnam regarding (i) any products tied to the Index, (ii) the use or suitability of the Index or (iii) any security in particular.

Any information, statement or opinion set forth herein is general in nature, is not directed to or based on the financial situation or needs of any particular investor, and does not constitute, and should not be construed as, investment advice, forecast of future events, a guarantee of future results, or a recommendation with respect to any particular security or investment strategy or type of retirement account. Individuals seeking financial advice regarding the appropriateness of investing in any securities or investment strategies should consult their financial professional.

## Index Information

The Putnam Dynamic Low Volatility Excess Return Index™ (the "Index") is the property of Putnam Investments ("Putnam"), a Franklin Templeton company ("Franklin"), which has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) to calculate and maintain the Index. The Index is not sponsored by S&P Dow Jones Indices, their affiliates or their third-party licensors (collectively, "S&P Dow Jones Indices"). Franklin and S&P Dow Jones Indices (collectively, "Index Parties") will not be liable for any errors, omissions or interruptions in calculating the Index. The Index Parties make no representations or warranties, express or implied and shall have no liability with respect to the adequacy, accuracy, timeliness and/or completeness of the Index. Products based on the Index are not sponsored, endorsed, sold or promoted by the Index Parties and the Index Parties have no responsibilities, obligations or duties to purchasers of such products. Franklin Templeton®, Franklin®, Putnam Dynamic Low Volatility Excess Return Index™ and the corresponding logos are trademarks of Franklin or Putnam, a Franklin Templeton company. S&P® is a registered trademark of Standard & Poor's Financial Services LLC, and Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC.

The Index is an excess return index. The Index levels represent performance in excess of the U.S. Treasury 13-Week Bill High Discount Rate. The Index levels reflect the daily deduction of a fee at a rate of 0.50% per annum. This "embedded index cost" will reduce any change in index value over the index term that would otherwise have been used in the calculation of index interest, and it funds certain operational and licensing costs. It does not include fees or costs of any financial instrument referencing the index.

The Putnam Dynamic Low Volatility Excess Return Index™ (PDLV5E) is available within select products issued by Symetra Life Insurance Company.

"Volatility Control" Indices are designed to shift allocations, based on signals in the market, to help keep volatility at or near the stated target. When market volatility is relatively low the index will likely maintain exposure to riskier assets, such as equities. When volatility increases, the index is likely to reallocate so that it is weighted toward low-risk assets, such as cash.

Index-linked annuities are insurance contracts issued by an insurance company. Index-linked annuities are not invested in the Index itself, but rather interest is credited based on the performance of the Index and the rules prescribed in the insurer's Index crediting strategy. Index-linked annuities are not issued by Franklin.

## Hypothetical and Live Performance

Any data for the period prior to index inception consists of pre-inception data calculated by retroactively applying the Index methodology. Simulated returns and pre-inception data are hypothetical and included for illustrative purposes only. Performance is based on hypothetical returns prior to index inception and actual returns thereafter.

The Index was created on June 24, 2020. Levels for the Index prior to June 24, 2020 represent hypothetical data determined by retroactive application of a back-tested model, itself designed with the benefit of hindsight. Actual performance will vary, perhaps materially, from the performance set forth herein.

The performance of the Index may include certain embedded transaction costs but does not include fees or costs of any financial instrument referencing the Index.

Hypothetical performance results may have other inherent risks. No representation is being made that any account will or is likely to achieve profit or loss. The relevant market and economic conditions that prevailed will not necessarily reoccur. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be accounted for. All hypothetical results are presented for illustrative purposes only. **Hypothetical and past performance is no guarantee of future performance.**

Back-testing and other statistical analysis material that is provided in connection with the Index use simulated analysis and hypothetical circumstances to estimate how it may have performed prior to its actual existence. The results obtained from "back-testing" information should not be considered indicative of the actual results that might be obtained from an investment or participation in a financial instrument or transaction referencing the Index. Neither Putnam nor Franklin nor S&P Dow Jones Indices provide assurance or guarantee that the products linked to the Index will operate or would have operated in the past in a manner consistent with these materials. The hypothetical historical levels have inherent limitations. Alternative simulations, techniques, modeling or assumptions might produce significantly different results and prove to be more appropriate. Actual results will vary, perhaps materially, from the simulated returns presented in this document.

The hypothetical performance information presented herein does not reflect the results of actual trading and calculation of the Index levels and performance do not reflect the fees and expenses that an investor would pay. These fees and expenses would cause the actual and back-tested performance of the Index to be lower.

**Sources: Bloomberg and Morningstar, underlying data provider S&P Opco, LLC.** Information is historical and may not reflect current or future portfolio characteristics. All portfolio holdings are subject to change. Important data provider notices and terms available at [www.franklintempletondatasources.com](http://www.franklintempletondatasources.com).

# Chronic Care Advantage Rider

Nearly half the U.S. population—or 133 million Americans—lives with at least one chronic condition, with 40% suffering from two or more.<sup>1</sup>

Available on Symetra’s indexed universal life (IUL) products, our Accelerated Death Benefit for Chronic Care Advantage Rider can help provide protection against the high cost of care if the insured becomes cognitively impaired or chronically ill and is unable to perform two or more of the six activities of daily living.<sup>2,3</sup>

How it works:

- At the time of policy application, you’ll choose either a 50% or 100% acceleration of the policy’s death benefit, and a monthly payout option of either 2% or 4%.
  - Benefits paid at the time of the approved claim will be less than or equal to the maximum daily limit for benefits set by the Internal Revenue Service for each calendar year, multiplied by 30.
  - There are no restrictions on how the proceeds can be used.
  - While on claim, Symetra waives the rider’s monthly charges in proportion to the acceleration percentage you selected (either 50% or 100%). Annual recertification of the qualifying impairment or illness is required.
- The hypothetical example below assumes a 55-year-old male with a \$500,000 Symetra IUL policy and a Chronic Care Advantage Rider with a 50% acceleration percentage and 4% payout.
  - In policy year 26, at the age of 80, the insured is diagnosed with a qualifying chronic condition and exercises the Chronic Care Advantage Rider. The benefit payment of \$10,000 is less than the then-current IRS monthly per-diem limit.<sup>4</sup>

Death benefit at the time of claim =  
\$500,000

X

50% of death benefit accelerated =  
\$250,000

X

4% payout  
selected

=

\$10,000  
benefit amount

Hypothetical example: \$500,000 death benefit at time of claim						
Month	Year	Age	Chronic Care Advantage Rider benefit amount	Chronic Care Advantage Rider claim amount	Death benefit after claim	Policy value after cash claim
1	26	80	\$250,000	\$10,000	\$490,000	\$245,411
2	26	80	\$240,000	\$10,000	\$480,000	\$241,168
3	26	80	\$230,000	\$10,000	\$470,000	\$236,898
4	26	80	\$220,000	\$10,000	\$460,000	\$232,599
5	26	80	\$210,000	\$10,000	\$450,000	\$228,272
6	26	80	\$200,000	\$10,000	\$440,000	\$223,915
7	26	80	\$190,000	\$10,000	\$430,000	\$219,530
8	26	80	\$180,000	\$10,000	\$420,000	\$215,116
9	26	80	\$170,000	\$10,000	\$410,000	\$210,672
10	26	80	\$160,000	\$10,000	\$400,000	\$206,199
11	26	80	\$150,000	\$10,000	\$390,000	\$201,695
12	26	80	\$140,000	\$10,000	\$380,000	\$197,162
1	27	81	\$130,000	\$10,000	\$370,000	\$192,597
2	27	81	\$120,000	\$10,000	\$360,000	\$187,975
3	27	81	\$110,000	\$10,000	\$350,000	\$183,323
4	27	81	\$100,000	\$10,000	\$340,000	\$178,642
5	27	81	\$90,000	\$10,000	\$330,000	\$173,931
6	27	81	\$80,000	\$10,000	\$320,000	\$169,189
7	27	81	\$70,000	\$10,000	\$310,000	\$164,417
8	27	81	\$60,000	\$10,000	\$300,000	\$159,614
9	27	81	\$50,000	\$10,000	\$290,000	\$154,780
10	27	81	\$40,000	\$10,000	\$280,000	\$149,915
11	27	81	\$30,000	\$10,000	\$270,000	\$145,019
12	27	81	\$20,000	\$10,000	\$260,000	\$140,090
1	28	82	\$10,000	\$10,000	\$250,000	\$135,130
Total				\$250,000		

The bottom line

- After claim, at life expectancy at age 84, the policy’s cash value and death benefit are projected to be \$250,000 and \$141,057 respectively.
- At age 90, the policy cash value and death benefit are projected to be \$250,000 and \$144,647 respectively.

An IUL policy with Symetra’s Chronic Care Advantage Rider can help you pay for unexpected expenses today, and still provide death benefit protection for your beneficiaries.

This hypothetical example is for illustrative purposes only and actual results will vary by product and case design.

---

## Ask your insurance professional if Symetra's Chronic Care Advantage Rider is right for you.

Life insurance is issued by Symetra Life Insurance Company, 777 108th Avenue NE, Suite 1200, Bellevue, WA 98004-5135. Policies and riders may not be available in all U.S. states or any U.S. territory and terms and conditions may vary by the state in which they are available.

The Accelerated Death Benefit for the Chronic Care Advantage Rider is available with Symetra's indexed universal life policies.

A rider is a provision of the policy that may have additional costs, limitations, potential benefits and features that should never be confused with the base policy itself.

Before evaluating the benefits of a rider, carefully examine the policy to which it is attached. Certain benefits or riders may have tax implications. You should consult with your legal or tax professional prior to purchasing.

Life insurance policies contain exclusions, limitations, reductions of benefits and terms for keeping them in-force. Please contact your insurance professional for complete details.

The Accelerated Death Benefit for Chronic Care Advantage Rider is usually issued under rider form number ICC23\_LE1, and is offered at application for an additional cost. The acceleration and payout percentages cannot change once the rider is issued. This rider is only available for issue ages 20-80, and if elected, additional underwriting will be required. If the insured qualifies, the rider rate class will be the same as on the base policy. It's possible that the insured is approved for the base policy but declined for this rider based on the rider underwriting results. This rider is not available on policies with ratings worse than Table 4, with annual flat extras exceeding \$5 per \$1,000, or with both flat extras and table rates. Exercising this rider will prohibit the policyowner from exercising the Accelerated Death Benefit for Terminal Illness Rider. If the optional Accelerated Death Benefit for Chronic Care Advantage Rider is selected, the Accelerated Death Benefit for Chronic Illness Rider is not available.

Included in the policy, the Accelerated Death Benefit for Chronic Illness Rider is usually issued under form number ICC16\_LE6 in most states. If the optional Accelerated Death Benefit for Chronic Care Advantage Rider is selected, the Accelerated Death Benefit for Chronic Illness Rider is not available. Included in the policy, the Accelerated Death Benefit for Terminal Illness Rider is usually issued under form number ICC16\_LE5 in most states.

Receipt of an accelerated death benefit may be taxable, especially if the insured does not have a prescribed plan of care. You should consult with your personal tax or legal professional before applying for this benefit. You may also lose your right to receive certain public funds such as Medicare, Medicaid, Social Security, Supplemental Security Income, and possibly others. This benefit is intended to qualify as an accelerated death benefit under section 101(g) of the Internal Revenue Code. The death benefit value, policy value and loan value will be reduced if an accelerated death benefit is paid. For policies with a lapse protection benefit, the lapse protection value will also be reduced. There is no restriction on the use of proceeds of these accelerated death benefits.

Guarantees and benefits are subject to the claims-paying ability of Symetra Life Insurance Company.

<sup>1</sup> Chronic Diseases in America | CDC. Last reviewed: December 13, 2022.

<sup>2</sup> Chronically ill is defined as a person who, during the prior 12-month period, has been certified by a licensed health care professional as being unable to perform at least two of the six activities of daily living for a period of at least 90 days, or requiring substantial supervision to protect his or her health and safety due to severe cognitive impairment.

<sup>3</sup> "Cognitive impairment" generally means a loss or deterioration in a person's intellectual capacity and includes diseases such as Alzheimer's and various forms of irreversible dementia. "Activities of daily living" generally means routine daily self-care activities, such as getting dressed, eating, using the bathroom and getting in and out of bed.

<sup>4</sup> At the beginning of each new payment period, your accelerated death benefit payments will be updated, if appropriate, to reflect the current per-diem limits set by the IRS.

mark@novusfg.com

## Life Insurance that offers death benefit protection and future income potential

At its core, Symetra Protector IUL 6.0 is designed to provide income-tax-free death benefit coverage. However, it is also designed to enhance policy value growth through our index crediting strategies, potentially providing tax-advantaged supplemental income.

Although proceeds of life insurance are generally received income-tax-free by beneficiaries, estate and local taxes may apply. Consult your attorney or tax professional for more information.

- ✓ **Policy Value Growth Potential:** Seven index crediting strategies are available so you can participate in the growth of a rising market but are protected from the loss of a negative market.
  - ✓ **Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy:** Provides a lower participation rate than the Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy but applies an additional index credit rate to the Policy Value upon maturity of the index segment. This additional index credit rate is used to determine the additional index credit amount (bonus) and is in addition to any other index credits earned. Only allocations to this Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy will be eligible to receive this additional index credit amount. The additional index credit rate which determines the bonus is currently 1.00% but will never be less than the Guaranteed Minimum Additional Index Credit Rate shown in the policy. Election of this Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy does not guarantee a greater Policy Value credit than other index strategies.
  - ✓ **Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy:** Provides a higher participation rate than Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy. The Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy does not provide an additional index credit amount (bonus). Index credits are determined and credited at segment maturity. Election of a Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy does not guarantee a greater Policy Value credit than other index strategies.
  - ✓ **Symetra Allocation Index Strategies:** Are index crediting strategies which allocate the funds automatically to either the S&P 500® index strategy, or the JPMorgan ETF Efficiente® index strategy. Which strategy receives the allocation is based on an external market volatility index known as the Cboe's VIX index or the "VIX". If the VIX is below the VIX Threshold of 16, two business days prior to the Allocation Date, then the Allocation goes fully into the S&P 500® index strategy. If the VIX is equal or above the VIX Threshold of 16, two business days prior to the Allocation Date, then the Allocation goes fully to the JPMorgan ETF Efficiente® index strategy. Once your money has been allocated to either the S&P 500® index strategy or JPMorgan ETF Efficiente® 5 index strategy, it will remain in that index strategy until the segment matures and a new segment is created.
    - Symetra Allocation Index 1-Year Point to Point
    - Symetra Allocation Index 2-Year Point to Point
- Election of the Symetra Allocation Index Strategies does NOT guarantee a greater Index credit for any index segment term.
- ✓ **Core Index Strategies:** Lock-in any interest earnings and help protect against losses in negative markets. Our Core options include:
  - S&P 500® Composite Stock Price Index - 1-Year Point to Point
  - JPMorgan ETF Efficiente® 5 Index - 1-Year Point to Point
  - Blended S&P 500® Index and JPMorgan Efficiente® 5 Index - 2-Year Point to Point

✓ **Why Index Cap and Participation Rates Can Fluctuate:** Index caps and participation rates are primarily affected by Symetra's fixed income investment portfolio yields and hedging costs for participating in the index strategies. Symetra uses a hedging strategy that purchases option contracts on the selected index. The hedging strategies help support the index strategy's interest crediting rate. Hedging costs change with market conditions and can affect the index caps and participation rates declared by Symetra.

Periods of high fixed income portfolio yields and low hedging costs can produce higher declared index caps and participation rates. Periods of low fixed income portfolio yields and high hedging costs can produce lower declared index caps and participation rates.

✓ **Access:** Through withdrawals and loans, provides access to policy values for future supplemental income needs.

✓ **Guarantees:** Your policy contains a Lookback Guarantee which may provide an increase in policy value, if the average annual percentage rate of any actual index credits, over the respective Lookback Guarantee Period, is less than the average annual percentage rate of any index credits based on the Lookback Guarantee rate, as defined in the policy, per year cumulatively over resetting 8-year periods. The first 8-year period begins at the time your policy is issued and will be recalculated, over an 8-year period, after the previous period has elapsed.

✓ **Charitable Giving Benefit Rider:** For no extra premium, your policy can provide a qualified charity of your choice with an additional benefit of 1% of the base policy specified amount (up to \$100,000) upon the insured's death. This rider is only available at application.

Within this custom-tailored illustration, you'll find information on your premiums and death benefit, as well as detailed projections on how your policy value could potentially grow over time. We've created this illustration to help you and your insurance professional explore what Symetra Protector IUL 6.0 can do for you and the people you care about.

## Initial Annual Premium: \$10,000.00

You can choose the amount and frequency of your premiums, as long as you have enough Net Surrender Value to cover policy charges. Depending on how your policy performs, you may need to maintain, resume or increase your premium payments in order to continue your death benefit.

## Benefits Information

The following benefits are included in this illustration:

- ✓ Accelerated Death Benefit for Chronic Care Advantage Rider - Form Number ICC23\_LE1
- ✓ Accelerated Death Benefit for Terminal Illness Rider (no additional premium) - Form Number ICC16\_LE5
- ✓ Overloan Lapse Protection Rider (no additional cost unless exercised) - Form Number ICC17\_LE5
- ✓ Charitable Giving Benefit Rider (no additional premium) - Form Number ICC16\_LE8
- ✓ Lapse Protection Benefit

## Optional Illustrated Benefits

**Accelerated Death Benefit for Chronic Care Advantage Rider ("Chronic Care Advantage")** is a rider that allows you to access up to 100% of the death benefit if the insured is certified by a licensed health care practitioner as chronically ill, as defined in the Policy. This rider is available for an additional cost and requires additional underwriting. Refer to the Accelerated Benefit Application Disclosure form for complete details.

At the time of claim, we set your Rider Benefit Balance. The Rider Benefit Balance is the Death Benefit multiplied by your Acceleration Percentage. The monthly benefit amount under this rider is equal to the lesser of:

- The Rider Benefit Balance multiplied by your Payout Percentage; or
- The then current IRS per diem limit multiplied by 30.

**Your Elections (made at application and may not be changed):**

Chronic Care Advantage Acceleration Percentage elected: 100%

Chronic Care Advantage Payout Percentage elected: 4%

**Important Things to know about this benefit:**

- Any Specified Amount increases or decreases prior to claim will impact the Rider Benefit Balance.
- The final Rider Benefit Balance will be set at time of claim.
- If you choose to claim this benefit and your Death Benefit Option is not Option A it will be changed to Option A.
- Exercising this rider will preclude you from exercising the Accelerated Death Benefit for Terminal Illness Rider.
- If you choose to terminate this rider, rider charges will no longer be assessed. Any rider charges already assessed on the policy will not be refunded.

**While you are on claim:**

- A portion of Your Monthly charges will be waived based on the Acceleration Percentage you elected. So, if you choose an Acceleration Percentage of less than 100%, not all monthly deductions will be waived.
- Post issue changes (withdrawals, loans, face decreases, face increases, and death benefit option changes) are not permitted while receiving payments.
- If there is an active loan on the policy, some of each accelerated death benefit payment will be used to pay for the loan.
- Any Accelerated Death Benefit payments under this Rider will reduce any policy value, lapse protection value, death benefit and loan values.
- Once the entire accessible amount of death benefit has been accelerated, Accelerated Death Benefit payments under Chronic Care Advantage will stop.
- The receipt of an Accelerated Death Benefit may be taxable, especially if the insured does not have a prescribed plan of care. You should consult your personal tax or legal professional before applying for this benefit. You may lose your right to receive certain public funds such as Medicare, Medicaid, Social Security, Supplemental Security, Supplemental Security Income (SSI), and possibly others. The benefits payable under this rider are intended to qualify as accelerated death benefits under section 101(g) of the Internal Revenue Code.
- To continue receiving Accelerated Death Benefit payments under this rider, the insured must be recertified every 12 months by a licensed health care practitioner and if recertification is not received on a timely basis, the payments will stop and monthly charges will resume.

## Benefits Included at No Additional Premium

**Accelerated Death Benefit for Terminal Illness Rider** allows you to access up to \$385,436 of the policy's death benefit while living if a physician determines the insured is terminally ill with less than 12 months to live. The Accelerated Benefit Death payment is discounted by one year of interest guaranteed not to exceed the policy Loan Interest Charged on Borrowed Amounts. Any changes to the death benefit will result in a change to the amount available. ICC16\_LE5

**Overloan Lapse Protection Rider** protects your policy from inadvertently lapsing and potentially losing its favorable life insurance tax treatment when an outstanding loan balance nears the policy value. ICC17\_LE5

Symetra Life Insurance Company will notify you in writing of your option to exercise the rider when qualifications are met. When exercised, no further premium payments or loan repayments are due and your policy will not lapse. Additional loans and withdrawals are no longer available.

Qualifying conditions:

- When the policy value multiplied by the applicable IRS Guideline factor exceeds your death benefit as detailed in your policy.
- The insured is at least 75 years of age.
- The policy is in-force for at least 15 years.
- Loan amount must exceed the smaller of either: [a] 93% multiplied by the policy value, or [b] (100% - applicable Overloan Protection Exercise Charges) multiplied by the policy value.

Exercising the rider option:

- Rider must be exercised in writing.
- Death benefit option is level specified amount. If currently not level, it will be changed to level.
- Policy loan type is standard. If currently not standard, it will be converted to standard.
- One-time charge is deducted from the policy value when exercised.
- Unloaned policy value will be moved to the fixed account.
- Once exercised, the rider cannot be reversed.

**Neither the IRS nor the courts have ruled on the tax consequences of exercising the Overloan Lapse Protection Rider. It is possible that the IRS or a court could assert that the Policy has been effectively terminated and that the outstanding loan balance should be treated as a distribution, all or a portion of which could be taxable when the Rider is exercised. In addition, this Overloan Protection Rider may not be appropriate for your particular circumstances. Consult with a tax professional regarding the risks associated with exercising this rider.**

**Charitable Giving Benefit Rider** pays an additional benefit of \$5,139 to a qualified charity of your choice upon the death of the insured. This amount is based on the initial death benefit. Any changes to the death benefit will result in a change to the amount available. ICC16\_LE8

**Lapse Protection Benefit** guarantees that when you are in a Lapse Protection Benefit Period, your policy will not enter the grace period, even if the Net Cash Surrender Value is insufficient to cover monthly deductions.

*The Lapse Protection Benefit Period is directly affected by the timing and amount of premium payments, loans and withdrawals. To ensure that your policy remains in the Lapse Protection Benefit Period illustrated, it is important that premium payments and any loans or withdrawals occur only as illustrated. Any deviations from this illustration will impact the actual Lapse Protection Benefit Period and could result in the need for additional premium payments or loan repayments to restore the Lapse Protection Benefit Period to the originally illustrated duration.*

**SARA WIDDIS**

Age & Risk Class: Female, Age 61, Standard Non-Nicotine

Initial Annual Premium: \$10,000

Initial Death Benefit: \$513,914

---

Death benefit changes or loans and withdrawals, other than what is illustrated, will impact the Lapse Protection Benefit Period. If the policy is being kept in-force only by the Lapse Protection Benefit, the opportunity to build policy value may be lost. Additionally, if this occurs, loans and withdrawals are no longer allowed.

A rider is a provision of the policy that may have additional costs, limitations, potential benefits and features that should never be confused with the base policy itself. Before evaluating the benefits of a rider, carefully examine the policy to which it is attached.

## Index Strategies

Symetra Protector IUL 6.0 is designed to maximize your policy's growth and income potential through our Index Strategies. Each index strategy provides a guaranteed minimum crediting rate so you'll never have negative returns in a down market. Plus, any index-linked gains your policy value receives are locked-in and shielded from market declines in the future. You may elect to choose from two Putnam Dynamic Low Volatility Excess Return Index strategies, two Symetra Allocation Index strategies and three Core Index strategies.

**Putnam Dynamic Low Volatility Excess Return with Bonus Strategy:** Provides a lower participation rate than the Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy but applies an additional index credit rate to the Policy Value upon maturity of the index segment. This additional index credit rate is used to determine the additional index credit amount (bonus) and is in addition to any other index credits earned. Only allocations to this Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy will be eligible to receive this additional index credit amount. The additional index credit rate which determines the bonus is currently 1.00% but will never be less than the Guaranteed Minimum Additional Index Credit Rate shown in the policy. Election of this Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy does not guarantee a greater Policy Value credit than other index strategies.

**Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy:** Provides a higher participation rate than Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy. The Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy does not provide an additional index credit amount (bonus). Index credits are determined and credited at segment maturity. Election of a Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy does not guarantee a greater Policy Value credit than other index strategies.

**Symetra Allocation Index Strategies:** Are index crediting strategies which allocate the funds automatically to either the S&P 500® index strategy, or the JPMorgan ETF Efficiente® index strategy. Which strategy receives the allocation is based on an external market volatility index known as the Cboe's VIX index or the "VIX". If the VIX is below the VIX Threshold of 16, two business days prior to the Allocation Date, then the Allocation goes fully into the S&P 500® index strategy. If the VIX is equal or above the VIX Threshold of 16, two business days prior to the Allocation Date, then the Allocation goes fully to the JPMorgan ETF Efficiente® index strategy. Once your money has been allocated to either the S&P 500® index strategy or JPMorgan ETF Efficiente® 5 index strategy, it will remain in that index strategy until the segment matures and a new segment is created.

- ✓ Symetra Allocation Index 1-Year Point to Point
- ✓ Symetra Allocation Index 2-Year Point to Point

**Our Core strategies:** Offer you the option to select from three index strategies, including:

- ✓ S&P 500® Composite Stock Price Index - 1-Year Point to Point
- ✓ JPMorgan ETF Efficiente® 5 Index - 1-Year Point to Point
- ✓ Blended S&P 500® Index and JPMorgan ETF Efficiente® 5 Index - 2-Year Point to Point

Because Symetra Protector IUL 6.0 is not an investment contract, net premium is not directly invested in the market or any index strategy.

**Creating Index Segments**

When you pay a premium, a premium charge is subtracted from your premium, resulting in what is called net premium. The net premium stays in the Holding Account, along with interest earned, if any, during the period as well as any standard loan repayments made. On the next monthly allocation date, the amount in the Holding Account is allocated to the fixed account and/or index strategies, based on your chosen allocation. Any amount you have allocated to an index strategy creates an index segment. Once an index segment has been created, you may not transfer out until the end of the segment term. At the end of the segment term, a new segment will be created based on your current allocation.

**Calculating Index Credits**

An index strategy credits interest by measuring the percentage difference between values of the measuring index(es) (S&P 500®, for example) at the start and end of the segment term, then applying any applicable index cap, spread, floor and participation rate.

Each index segment has its own index crediting method, index value, index cap, index floor, index participation rate, index segment term, and index start and maturity date. The index caps, floors and participation rates after the initial index segment term may be higher or lower than the initial rates, but will never be less than the guaranteed minimums shown in the policy. The index spreads after the initial index segment term may be higher or lower than the initial spreads, but will never be higher than the guaranteed maximum shown in the policy. The segment cap, spread, floor and participation rates shown in this illustration are as of 4/16/2025.

**Index Cap:** The maximum interest rate a segment will be credited. If the measuring index's performance is greater than the cap, the segment interest rate will equal the cap.

**Index Floor:** The minimum interest rate a segment will be credited. If the measuring index's performance is less than the floor, the segment interest rate will equal the floor.

**Index Participation Rate:** This rate describes how much of the change to the index(es) that you "participate" in.

**Index Spread Rate:** The index spread rate, if applicable, is a rate used to determine the final Index Credit. The index spread rate must be exceeded by the index in order to earn any Index Credits.

## Hypothetical Returns by Strategy

The historical rates shown below are determined by applying the current index cap, index floor and participation rate to the most recent 25 full calendar years of historical index performance. If no index value was published on the beginning and end dates of the calendar year, then the most recent previous index value was used to determine the historical rates.

**IMPORTANT NOTE:** The Putnam Dynamic Low Volatility Excess Return Index launched April 2020. Values in this illustration are based on hypothetical back-tested performance prior to this date. Back-testing uses simulated analysis and hypothetical circumstances to estimate how the index may have performed prior to its actual existence. Index performance calculated by back-testing is purely theoretical. The hypothetical back-tested performance in this illustration has not been verified by an independent third party. Neither Symetra nor Putnam makes any representation that the index will perform as represented in this illustration.

**IMPORTANT NOTE:** The JPMorgan ETF Efficiente® 5 Index launched on October 29, 2010. Values in this illustration are based on a combination of actual index performance after this date and hypothetical back-tested performance prior to this date. Back-testing uses simulated analysis and hypothetical circumstances to estimate how the index may have performed prior to its actual existence. Index performance calculated by back-testing is purely theoretical. The hypothetical back-tested performance in this illustration has not been verified by an independent third party. Neither Symetra nor JPMorgan makes any representation that the index will perform as represented in this illustration.

The actual credited rates will vary based on the actual change in the index and actual declared cap and participation rate within each index segment. These figures do not represent actual interest that would have been credited because the index cap and participation rate would have changed over time and actual results would have been different. There are administrative, cost of insurance and product charges associated with the Symetra Protector IUL 6.0 policy. The historical returns by strategy do not reflect these charges. It is not meant to predict future performance.

**SARA WIDDIS**

Age &amp; Risk Class: Female, Age 61, Standard Non-Nicotine

Initial Annual Premium: \$10,000

Initial Death Benefit: \$513,914

The Maximum Illustrated Rate for each strategy is calculated by a method consistent with applicable regulations. The Averages are based on the past 20 and 25 years of performance starting on 1/1/2000, using the current index cap, index floor and index participation rate. A number of different reasonable methods may be used to calculate the averages. The maximum illustrated rates and averages are not an indication of future performance and are not guaranteed.

<b>Putnam Dynamic Low Volatility Excess Return Index</b>	<b>Maximum Illustrated Rate</b>	<b>10-Year Average</b>	<b>20-Year Average</b>	<b>25-Year Average</b>

It is Symetra's goal to be able to allow you to better understand and compare index account performance against other indexed universal life products that you may be considering purchasing. Along the same lines, Symetra's Protector IUL 6.0 product must be compliant with all applicable industry illustration guideline(s). To that note, we follow a regulatory illustration concept known as the *Benchmark Index Account*, which is derived under the following industry consistent approach:

- Looking back at the historical period of S&P 500 index returns (excluding dividends) over the previous 66 years, starting with the current calendar year
- Incorporating the product's current participation rate, index cap and index floor for the product's account (or equivalent account)
- Calculating the arithmetic average of all 25-year previous periods of time, inclusive of every trading day throughout this time period (which covers over 10,000 specific points in time)

From this, the maximum crediting rate that is allowed to be shown on your illustration is determined as shown above, along with the minimum and maximum rates derived under this calculation, which is required to also be provided for reference purposes:

Maximum Illustrated Rate	7.40%
Minimum Illustrated Rate	3.86%

## Index Strategies Disclosures

The S&P 500® Index is a product of S&P Dow Jones Indices LLC or its affiliates ("SPDJI"), and has been licensed for use by Symetra Life Insurance Company ("Symetra"). S&P®, S&P 500®, US 500, The 500, iBoxx®, iTraxx® and CDX® are trademarks of S&P Global, Inc. or its affiliates ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"); and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by Symetra. Symetra's products are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, their respective affiliates, and none of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the S&P 500® Index.

The JPMorgan ETF Efficient® 5 Index ("JPMorgan Index") has been licensed to Symetra Life Insurance Company (the "Licensee") for the Licensee's benefit. Neither the Licensee nor Symetra Protector IUL (individually, the "Product") is sponsored, operated, endorsed, recommended, sold or promoted by J.P. Morgan Securities LLC ("JPMS") or any of its affiliates (together and individually, "JPMorgan"). JPMorgan makes no representation and gives no warranty, express or implied, to contract owners in or those otherwise taking exposure to the Product. Such persons should seek appropriate professional advice before making any investment. The JPMorgan Index has been designed and is compiled, calculated, maintained and sponsored by JPMS without regard to the Licensee, the Product or any contract owner. JPMorgan is under no obligation to continue compiling, calculating, maintaining or sponsoring the JPMorgan Index. JPMorgan may independently issue or sponsor other indices or products that are similar to and may compete with the JPMorgan Index and the Product. JPMorgan may also transact in assets referenced in the JPMorgan Index (or in financial instruments such as derivatives that reference those assets). These activities could have a positive or negative effect on the value of the JPMorgan Index and the Product.

Except for the JPMorgan ETF Efficient® 5 Index, and the Putnam Dynamic Low Volatility Excess Return Index, the performance of an index does not include the payment or reinvestment of dividends in the calculation of its performance.

The policy does not directly participate in any outside investment or index.

The Putnam Dynamic Low Volatility Excess Return Index (the "Index") is the property of Putnam Investments, LLC, which has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) to calculate and maintain the Index. The Index is not sponsored by S&P Dow Jones Indices or its affiliates or its third party licensors (collectively, "S&P Dow Jones Indices"). Neither Putnam Investments, LLC nor S&P Dow Jones Indices will be liable for any errors or omissions in calculating the Index. Putnam Dynamic Low Volatility Excess Return Index™ is a trademark of Putnam Investments, LLC. "Calculated by S&P Dow Jones Indices" and the related stylized mark(s) are service marks of S&P Dow Jones Indices and have been licensed for use by Putnam Investments, LLC. S&P® is a registered trademark of Standard & Poor's Financial Services LLC ("SPFS"), and Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones").

## Policy Details

### About this illustration

Symetra Protector IUL 6.0 is a Flexible Premium Adjustable Life Insurance Policy with Index-Linked Interest Option issued by Symetra Life Insurance Company (SLIC), 777 108th Avenue NE, Suite 1200, Bellevue, WA 98004.

This illustration explains the elements of the policy you are applying for. Many features of this illustration, including but not limited to, amount and frequency of premiums, death benefit amounts and interest rate, have a material impact on the policy. You should request different scenarios to see how each feature can impact the values shown.

**This is an illustration only. An illustration is not intended to predict actual performance. Interest rates or values that are set forth in the illustration are not guaranteed, except for those items clearly labeled as guaranteed.**

This illustration assumes that the currently illustrated non-guaranteed elements used will not change for all years shown. This is not likely to occur, and actual results may be more or less favorable than those shown. Assumptions on which non-guaranteed elements are based are subject to change.

### Underwriting

Your actual risk class will depend on the outcome of underwriting. Illustrated values will be impacted if your actual risk class is different.

### Net Death Benefit

Initial: \$513,914

Death Benefit Option A:  
Level

This is the amount your beneficiaries will receive upon the death of the insured. The death benefit option you select will have an impact on the amount received. The net death benefit is reduced by any loans and loan interest.

### Premium

Initial: \$10,000

Frequency: Annual

This is the amount you plan to pay each year. The illustration shows premium payments paid on the first day of each payment period. We reserve the right to require additional underwriting if the premium will result in an immediate increase in the difference between the death benefit and the policy value.

The amount required to place the policy in-force is \$4,296.00. You will not be billed for remainder of the initial premium. Payment of less than the illustrated initial premium you selected, even if the remainder of the initial premium is subsequently submitted, could result in earlier lapse and generally lower cash values than those illustrated.

### Premium Allocation

When you pay a premium, a premium charge is subtracted from your premium. You may allocate your net premium payment to the fixed account and/or any of the index strategies that we make available to you.

You have elected that your premiums be allocated as follows:

**SARA WIDDIS**

Age &amp; Risk Class: Female, Age 61, Standard Non-Nicotine

Initial Annual Premium: \$10,000

Initial Death Benefit: \$513,914

<b>Putnam Dynamic Low Volatility Excess Return Index</b>	<b>Percentage</b>	<b>From</b>	<b>Through</b>
With Bonus	100.00%	1	59
With High Participation Rate	0.00%	1	59
<b>Symetra Allocation Index Options</b>	<b>Percentage</b>	<b>From</b>	<b>Through</b>
1-Year Point to Point	0.00%	1	59
2-Year Point to Point	0.00%	1	59
<b>Core Options</b>	<b>Percentage</b>	<b>From</b>	<b>Through</b>
S&P 500® Index	0.00%	1	59
JPMorgan ETF Efficiente® 5 Index	0.00%	1	59
Blended S&P 500® Index and JPMorgan ETF Efficiente® 5 Index	0.00%	1	59
<b>Fixed Account</b>	<b>Percentage</b>	<b>From</b>	<b>Through</b>
	0.00%	1	59

Please note, Symetra will issue your policy with the index selection options chosen by you in the Index Coverage Details of the supplemental application, which may be different from those index allocations shown in this sales illustration. It is recommended You request a sales illustration which corresponds to Your selected index allocations in the application supplement.

**Index Segment Interest Rate**

The illustrated interest rates for the index segments are as follows:

<b>Putnam Dynamic Low Volatility Excess Return Index</b>	<b>Rate</b>	<b>From</b>	<b>Through</b>
With Bonus	5.94%	1	59
With High Participation Rate	0.00%	1	59
<b>Symetra Allocation Index</b>	<b>Rate</b>	<b>From</b>	<b>Through</b>
1-Year Point to Point	0.00%	1	59
2-Year Point to Point	0.00%	1	59
<b>Core</b>	<b>Rate</b>	<b>From</b>	<b>Through</b>
S&P 500® Index	0.00%	1	59
JPMorgan ETF Efficiente® 5 Index	0.00%	1	59
Blended S&P 500® Index and JPMorgan ETF Efficiente® 5 Index	0.00%	1	59

**Fixed Account**

The fixed account earns interest at a declared rate. The fixed account interest rate will never be less than the guaranteed minimum interest rate.

<b>Fixed Account</b>	<b>Illustrated Rate</b>	<b>From</b>	<b>Through</b>
	5.25%	1	59

**Lookback Guarantee**

Your policy contains a Lookback Guarantee which may provide an increase in policy value, if the average annual percentage rate of any actual index credits, over the respective Lookback Guarantee Period, is less than the average annual percentage rate of any index credits based on the Lookback Guarantee rate, as defined in the policy, per year cumulatively over resetting 8-year periods. The first 8-year period begins at the time your policy is issued and will be recalculated, over an 8-year period, after the previous period has elapsed.

**Policy Value & Net Surrender Value**

The policy value consists of your net premiums, minus monthly deductions and withdrawals, plus any interest.

The Net Surrender Value is the amount available to you upon surrender and the amount available for loans and withdrawals. The Net Surrender Value is the policy value minus any surrender charges, loans and loan interest. Surrender charges are applicable for 14 years from issue.

**Loans and Withdrawals**

Loans are available immediately, as long as you have sufficient Net Surrender Value. There are 2 types of loans available: standard loans and participating loans.

Loan Type	Policy Value	Loan Interest Credited	Loan Interest Charged
Standard	Value is transferred to a loan account.	Fixed interest rate	Fixed loan rate
Participating	Value that serves as participating for the loan remains in the index account(s) and/or the fixed account.	Credited based on the performance of the index account(s) and/or fixed account.	Fixed loan rate

Only one type of loan is allowed at a given time. You can switch between loan types once per year on the policy anniversary.

Participating loans are made available to you. All such loans will remain in the Index Strategies that you have chosen and will be charged at a fixed interest rate determined by Symetra.

Standard Loan Current Loan Interest Charge Rate: 4.25%

Standard Loan Guaranteed Loan Interest Charge Rate: 4.25%

Participating Loan Current Loan Interest Charge Rate: 5.50%

Participating Loan Guaranteed Loan Interest Charge Rate: 5.50%

**SARA WIDDIS**

Age &amp; Risk Class: Female, Age 61, Standard Non-Nicotine

Initial Annual Premium: \$10,000

Initial Death Benefit: \$513,914

**Guideline Premium Test**

Initial Guideline Single

Premium: \$256,359

Initial Guideline Annual

Premium: \$18,772

Under a policy that qualifies as life insurance, gain is not taxable as long as it remains in the policy, and the death benefit is excludable from gross income. To qualify as life insurance for federal income tax purposes, the policy must satisfy one of two alternative tests under IRC section 7702. This illustration applies the Guideline Premium Test, which requires generally that the sum of the premiums paid under the policy, less certain withdrawals, at any time must not exceed the greater of the guideline single premium or the sum of the guideline annual premiums at such time and that the death benefit at any time is not less than the applicable percentage of the policy value at that time. Guidelines are calculated at issue, but must be recalculated upon a change in your underwriting risk classification or a change to the coverage of the policy. Failure to qualify as life insurance will result in adverse tax consequences.

**MEC Status**

Initial Annual Seven Pay

Premium: \$49,871

A loan or withdrawal from a life insurance policy generally is excluded from gross income to the extent it does not exceed the investment in the policy. However, if a life insurance policy also is a Modified Endowment Contract (MEC), a loan or withdrawal is includible in income to the extent of any gain on the policy, and an additional tax may apply. The gain is the excess of the policy value over the premiums paid reduced by any prior untaxed distributions and it is determined by aggregating the policy with all other MECs issued to the same policyowner in the same calendar year by affiliated life insurance companies. In general, a life insurance policy will be a MEC if the accumulated premiums paid under the policy at any time during a 7-year testing period exceeds the sum of the annual Seven Pay premiums as of that time, as determined in accordance with the requirements of IRC section 7702A.

Whether your policy will be a MEC depends on the timing and amount of premiums paid. The payment of premiums may be affected by your policy's features, your exercise of any policy options, and any changes you make to the policy. Whether the illustrated policy will become a MEC depends on the facts and circumstances. If your policy is at risk of becoming a MEC by some action you are about to take, we will notify you and give you an opportunity to avoid MEC treatment by reconsidering such action.

Based on our understanding of current tax laws, a policy issued and maintained consistent with this illustration would not become a MEC.

For tax implications, see your tax or legal professional.

**This illustration is not intended as investment, accounting, legal or tax advice and Symetra Life Insurance Company does not give investment, accounting, legal or tax advice. This illustration does not attempt to provide more than general U.S. tax information associated with life insurance policies. This information is written in connection with the promotion or marketing of life insurance issued by Symetra Life Insurance Company.**

**You should seek advice based on your particular circumstances from an independent tax professional.**

This is not a complete description of the Symetra Life Insurance Product. For a more complete description, please ask your insurance producer.

Not a bank or credit union deposit, obligation or guarantee	May lose value
Not FDIC or NCUA/NCUSIF insured	Not insured by any federal government agency

## Tabular Detail & Statement of Policy Cost & Benefit Information

Symetra Life Insurance Company, 777 108<sup>th</sup> Avenue NE, Suite 1200, Bellevue, WA 98004-5135

Initial Annual Premium Payment: \$10,000.00

Premiums Payable Through Age 100

A zero in the annual premium outlay column means that no premiums were paid in that year; it does not mean that the policy is paid up. Charges will continue to be deducted from the policy value. Depending on actual results, premiums may need to be increased or resumed.

Any deviations from this illustration will impact the actual Lapse Protection Benefit Period.

The effective policy loan annual percentage interest rate is determined at time of loan, but will never exceed:

Standard Loan Option Annual Interest Rate: 4.25%

Participating Loan Option Annual Interest Rate: 5.50%

Interest is charged in advance and is due from Owners on each Policy Anniversary for the next Policy Year. If the Owner does not pay such interest when due, the amount of the interest is added to the outstanding Loan Amount. Thus, unpaid interest is charged interest during the subsequent Policy Year.

## Statement of Policy Cost & Benefit Information

Symetra Life Insurance Company, 777 108<sup>th</sup> Avenue NE, Suite 1200, Bellevue, WA 98004-5135

### Primary Insured

#### SURRENDER COST INDEX @ 5%

Yr	GUARANTEED	NON-GUARANTEED
	Guaranteed Insurance Rates Guaranteed Interest (0.00%)	Current Insurance Rates Non-Guaranteed Interest (5.94%)
10	19.46	9.43
20	19.46	8.24

#### NET PAYMENT COST INDEX @ 5%

	GUARANTEED	NON-GUARANTEED
	Guaranteed Insurance Rates Guaranteed Interest (0.00%)	Current Insurance Rates Non-Guaranteed Interest (5.94%)
	19.46	19.46
	19.46	19.46

The Life Insurance Cost Indexes are useful only for the comparison of relative costs of two or more similar policies. An explanation of the intended use of these indexes is provided in the *Life Insurance Buyer's Guide*. These indexes reflect any illustrated policy changes.

### Policy Coverage

Coverage	Initial Death Benefit	Initial Annual Charge	Cash Value End of Year One
Protector IUL 6.0	\$513,914.00	\$2,500.77	\$0.00
Accelerated Death Benefit for Chronic Care Advantage Rider	N/A	\$212.40	N/A
Charitable Giving Benefit Rider	\$5,139.14	\$0.00	N/A
Accelerated Death Benefit for Terminal Illness Rider	N/A	\$0.00	N/A
Overloan Lapse Protection Rider	N/A	\$0.00	N/A

Table values reflect illustrated premiums, policy coverage elections, and features including but not limited to index allocations, interest rates and death benefit options.

Product Name Symetra Protector IUL 6.0 - GPT

### Insured Information:

Name SARA WIDDIS  
Issue Age 61  
Gender Female  
Risk Class Standard Non-Nicotine

### Policy Information:

Issue State OH  
Initial Death Benefit \$513,914  
Base Coverage \$513,914.00  
Supplemental Coverage \$0.00  
Death Benefit Option Level

### Premium Information:

Planned Premium Annual  
Frequency  
Planned Modal Premium \$10,000.00  
Year 1  
Amount required to place \$4,296.00  
the policy in-force  
Premium Deposit Account No

### Policy Values:

Target Premium \$9,573.44

### Riders:

Accelerated Death Benefit for  
Terminal Illness Rider Included  
Accelerated Death Benefit for  
Chronic Care Advantage Rider Elected  
Charitable Giving Benefit Rider Elected  
Lapse Protection Benefit Included  
Overloan Lapse Protection Rider Included

### Premium Limits Summary:

Seven Pay \$49,871.00  
Guideline Single \$256,359.00  
Guideline Level \$18,772.00  
Accumulated GLPs \$18,772.00  
Policy is not a MEC.

### 1035/Lump Sums:

Lump Sum Amount \$0.00  
Lump Sum Month 1  
1035 Amount \$0.00  
1035 Month 1  
1035 Loan Balance \$0.00  
1035 Policy Cost Basis \$0.00
